	NRH-ATR35		2	27%	50%	99%	7.2%	7.7%	50%

*Above colors are for reference only, figures are laboratory test results, actual production may vary from batch to batch

FEATURES

- ① Outstanding color stability and durability,
- ② Diminishing interior fading,
- ③ High VLT translucent and comfortable,
- ④ Impressive solar heat control,
- ⑤ Excellent infrared rejection
- ⑥ Scratch resistance
- ⑦ No interference with GPS or any RF devices

HIGHLIGHTS

Top of the line, the superb two ply Sican Sputter Film is produced by metalizing the film exterior in vacuum conditions; the metalizing is achieved at the atomic level. Sican Sputter films are characterized as best in solar energy control, low visible reflectivity and excellent appearance.

*Above colors are for reference only, figures are laboratory test results, actual production may vary from batch to batch

FEATURES

- ① Tough coating surface
- ② Easy shrink wrap
- ③ Metalized films (PRH) for better IR resistance

HIGHLIGHTS

With tough coating surface, the full range of films is scratch resistant with thick resistant coating. Cut down 99% harmful UV, with great total solar heat control. Two ply in reflective or non-reflective coating.

FEATURES

- ① No incomplete glue
- ② Easy shrink wrap
- ③ Long lasting color

HIGHLIGHTS

The Glue Coating is a line of economic designed dyed films. Stable in color and long lasting quality, it's the most competitive line in the market. It uses the best grade raw materials without incomplete glue, easy to wrap. One ply non-reflective coating or two ply in reflective coating.

HIGHLIGHTS

Designed to protect your indoor furnishing, significantly reduce the energy cost, insure your privacy, blocking UV and any harmful solar heat. Sican spent years of R&D to come to this ultimate solar protection film: the Ray Shield series for all commercial and residential buildings; improving your office and home life. Ray Shield film is a metalized sputter coating film; it applies metals such as silver, copper, gold, titanium and so on; onto the surface of the film. High in transmission for visible light, and low outer light reflection, Ray Shield series is one of the toughest solar protection films in the market.

FEATURES

- ① Increase comfort and protect privacy
- ② Blocking UV, IR and glare reduction
- ③ Protect indoor furnishing
- ④ Lower overall energy cost
- ⑤ Metalized Sputter films applied
